

We are looking for people living with HIV, from a range of different ethnicities, sexual orientations and gender identities,

to take part in a survey for the People Living with HIV Stigma Index project.

The aim of the project, which is being led by people living with HIV, is to get a better understanding of the level of stigma and discrimination faced by people living with HIV in Aotearoa New Zealand.

Information gained will be used to inform the implementation of policy and practice and as an advocacy tool for the human rights of people living with HIV.

For further information or to participate in the project, check out the website at www.stigmaindex.nz or contact the Study Coordinator at info@stigmaindex.nz
